

F1 Semi - Automatic Stretch Wrapper

The F1 is a high performance power pre stretch semi automatic Stretch Wrapper.

Additional features include:

- Variable film carriage speed
- Pallet height measured automatically by a photocell
- Top and bottom wrapping time
- Power Pre Stretch film dispensing system
- Variable turntable speed

The standard F1 has a wrap height of 2100mm and a robust turntable for 2000kg static loading. The satellite bearings within the sub-frame of the turntable give both strength and rigidity to loads during wrap cycles.

The F1 has two wrap cycle programmes available:

- Single wrap → up wrapping cycle
- Double wrap → up and down wrapping cycle

The F1 is fitted with an easy load pre stretch unit that stretches the film up to 200%. This helps control load containment and is also a film saving device.

The F1 has adjustable settings ranging from carriage / turntable speeds, top and bottom wrap alteration and film tension. All can be controlled via the dials on the control panel.

M.J. Maillis UK Ltd
