

TP 701 Automatic Strapping Machine

ONE-PIECE STRAP CHUTE

Utilising a highly reliable one-piece strap chute made from a special low wear, low friction material. The one-piece strap chute (with no flap inside) guarantees that straps are applied at parallel positions.

DISPENSER RELEASE SWITCH

Friendly design makes it easier to pull the strap from the strap dispenser for the auto strap feeding.

SENSOR CONTROLLED HEATER

The fast heating mechanism is sensor controlled assuring consistent and high efficiency seals.

LOW VOLTAGE

All five DC motors and heaters are "stepped down" to 24V to increase the safety of the machine.

COMPACT MECHANICAL STRAPPING HEAD

The TP 701 uses the latest multi DC brushless motor technology to provide the highest level of accuracy currently available in the strapping machine industry.

With 30% fewer parts than comparable strapping machines, the TP 701 requires fewer adjustments, has fewer wearing components, and requires less maintenance.

The simple design of the TP 701 makes maintenance training far easier than previous strapping machines.

STRAP END EJECTOR

Ejects the end of coils, getting the machine ready for the next coil of strap.

JOG SWITCH

Enables you to stop the machine at any position for easy maintenance checking.

M.J. Maillis UK Ltd

WARRANTY

Meeting CE Regulations this machine is backed by a one year parts only warranty.

AFTER SALES SERVICE

M.J. Maillis UK Limited offers peace of mind with full after sales technical and service support from a nationwide team of engineers. We offer service agreements and scheduled maintenance contracts.

Technical Specification

Model	TP 701
Arch Sizes Available	650mm (W) X 500mm (H) & 550mm (W) X 400mm (H)
Capacity	50 straps per minute
Strap Sizes	5mm as standard (can order 6mm or 9mm)
Tension	1kg – 35kg
Power Supply	1 PHASE, 240V
Net Weight	160kgs
