New Maillis UK models and machine leasing service to be launched at PPMA Show

Hall 9, Stand No. 9146 27 – 29 September 05 NEC Birmingham

As a clear demonstration of their commitment in supporting the annual PPMA Show, complete end-of-line packaging solutions specialists, M. J. Maillis UK, will be displaying a wide range of highly innovative strapping, stretch wrapping, shrink systems, carton closure technologies and hand tools at this year’s event.

“The PPMA Show is one of the most important dates in our annual exhibition diary,” commented M. J. Maillis UK’s Sales and Marketing Director, Paul Evans. “As a result, we have gone to considerable lengths to provide delegates with the widest choice of leading-edge packaging solutions. At the same time, visitors to our stand will also be able to find out about a brand new machine leasing facility put in place to make our wrapping, strapping and sealing technologies even more accessible.”

Of particular interest to PPMA Show delegates will be the opportunity to find out more about the following flagship machines recently launched by M. J. Maillis UK:

New Mancon high-speed stretch wrapper

Following in the footsteps of Maillis's much acclaimed Mancon 2201 high performance stretch wrapper, the newly launched Mancon 1710 is one of the fastest wrapping solutions currently on the market. An evolution of the outstanding technologies already to be found on the Mancon 2201, this latest model incorporates a larger carbon composite ring for a more positive drive, lower maintenance, an advanced film carriage and film cut clamp device, enhanced top sheet assembly, a demountable frame for easier installation and a smaller footprint – a major benefit for packaging lines with limited floor space.

Greater speed and efficiency in semi-automatic wrapping

The other new machine that M. J. Maillis UK anticipate will be of specific interest to exhibitors is the PR303 semi-automatic stretch wrapper. Capable of achieving film stretch levels of up to 300% and throughput capabilities of around 50 pallets per hour, this latest Maillis model combines the benefits of both speed and efficiency. With an industry-leading warranty and minimal maintenance, the PR303 is all set to redefine the semi-auto market.

New machine leasing solutions

In addition to presenting the latest developments in its packaging technology, M. J. Maillis UK also intends to use the PPMA Show as the official launch pad for a new machine rentals programme that will provide customers with the opportunity to lease standard packaging machinery models from as little as £60.59pcm.
